## OBJECTIVE

Seeking a challenging position in software development to leverage my expertise in full-stack web development and problem-solving. Aiming to contribute to innovative projects at the intersection of technology and real-world applications such as e-commerce, security systems, and disaster response coordination.

## EDUCATION

**Walchand Institute of Technology, Solapur**

*B.Tech (Information Technology) - CGPA: 8.62*

**Nov 2022 – May 2026**

*Solapur, Maharashtra*

**Gram Vikas Vidyalaya, Pimpalgaon Hareshwar**

*HSC - Percentage: 73.83%*

**Aug 2020 – May 2022**

*Jalgaon, Maharashtra*

## SKILLS

**Languages:** Python, JavaScript, HTML, CSS

**Technologies/Frameworks:** React, Node.js, Express.js, Vite, Bootstrap, Next.js, Spring Boot

**Databases:** MySQL, MongoDB

**Developer Tools:** VS Code, Android Studio, PyCharm Community Edition

**Concepts:** Data Structures & Algorithms, RESTful APIs, Database Management Systems, Database Connectivity, Data Science, Android Development

## EXPERIENCE

**Tekdi Technologies Pvt. Ltd.**

*Intern - Full stack Developer*

**August 2025 – Present**

*Pune, Maharashtra*

- Contributing to full-stack development projects using React.js, Node.js, and MongoDB under agile workflows.
- Collaborating with senior developers to build scalable, high-performance web modules and reusable UI components.
- Assisting in API integration, debugging, and code optimization to enhance user experience and application efficiency.

**Pinnacle Labs**

*Virtual Internship - Web Developer*

**June 2024 – August 2024**

*Remote*

- Developed web applications using HTML, CSS, JavaScript, and React, contributing to front-end features and user interface enhancements.
- Collaborated with a team to integrate RESTful APIs and optimize backend connectivity with Node.js and MySQL.
- Participated in code reviews and agile development processes, ensuring high-quality deliverables.

## PROJECTS

**StockEase Nexus Analytics** 🗄️ | TypeScript, React, Firebase, React Native

**June 2025**

- Built a complete inventory and sales management system with web and mobile applications for real-time business monitoring.
- Developed the web dashboard using React and TypeScript with Firebase Firestore for real-time stock alerts.
- Integrated Firebase Authentication for secure, role-based user access across both platforms.
- Developed a cross-platform mobile app using React Native for on-the-go inventory tracking and report viewing.
- Implemented analytics visualization with Chart.js and responsive UI optimized for multiple devices.

**Sponsored Ecommerce Web-App** 🗄️ | React, Node.js, Express.js, MySQL

**September 2024**

- Built MensFyt, a men's fashion e-commerce platform with personalized recommendations, dynamic filtering, and a secure checkout system.
- Implemented a responsive UI with React and Tailwind CSS, enhancing user experience across devices.
- Designed RESTful APIs using Express.js for real-time inventory updates and user authentication.

**EduPath Pro** 🗄️ | Next.js, Firebase, Tailwind CSS

**October 2025**

- Developed a personalized education and career guidance platform for students using Next.js and Firebase.
- Implemented recommendation features based on interests, skills, and academic goals.
- Integrated Firebase Authentication and Firestore for user profiles and dynamic data storage.
- Built a modern, SEO-optimized interface with responsive design for both mobile and desktop users.

**MessMate Smart Hub** 🗄️ | React, TypeScript, Firebase, Tailwind CSS

**July 2025**

- Developed a comprehensive mess management system to streamline hostel and organization meal operations.
- Integrated smart QR attendance, automated menu planning, and digital payment tracking for improved transparency.
- Used Firebase Firestore for real-time data updates and authentication, ensuring secure and efficient operations.
- Designed a clean, responsive UI using Tailwind CSS and implemented a modular TypeScript architecture.

## ACHIEVEMENTS

---

Won 2nd Runner-Up, Innovision Avinya 2.0 24-Hour Hackathon (March 2024) – Developed a Graphical Password Authentication System.

Won 2nd Runner-Up, Innovision Avinya 3.0 24-Hour Hackathon (March 2025, Anticipated) – Designed a Disaster Response Coordination Platform.

Participant, VCET Hackathon (August 2024) – Created an educational platform for CET, JEE, and NEET preparation.
