OBJECTIVE

Seeking a challenging position in software development to leverage my expertise in full-stack web development and problem-solving. Aiming to contribute to innovative projects at the intersection of technology and real-world applications such as e-commerce, security systems, and disaster response coordination.

EDUCATION

Walchand Institute of Technology, Solapur   **Nov 202 nub2 – May 2026**
B.Tech (Information Technology) - CGPA: 8.62   *Solapur, Maharashtra*
Gram Vikas Vidyalaya, Pimpalgaon Hareshwar   **Aug 2020 – May 2022**
HSC - Percentage: 73.83%   *Jalgaon, Maharashtra*

SKILLS

Languages: Python, JavaScript, HTML, CSS
Technologies/Frameworks: React, Node.js, Express.js, Vite, Bootstrap, Next.js, Spring Boot
Databases: MySQL, MongoDB
Developer Tools: VS Code, Android Studio, PyCharm Community Edition
Concepts: Data Structures & Algorithms, RESTful APIs, Database Management Systems, Database Connectivity, Data Science, Android Development

EXPERIENCE

Pinnacle Labs   **June 2024 – August 2024**
Virtual Internship - Web Developer   *Remote*
- Developed web applications using HTML, CSS, JavaScript, and React, contributing to front-end features and user interface enhancements.
- Collaborated with a team to integrate RESTful APIs and optimize backend connectivity with Node.js and MySQL.
- Participated in code reviews and agile development processes, ensuring high-quality deliverables.

PROJECTS

StockEase Nexus Analytics ⬈ | TypeScript, React, Firebase   **June 2025**
- Built inventory system with real-time stock alerts using Firebase Firestore and TypeScript
- Implemented role-based access with Firebase Authentication
- Created dashboard for sales analytics with React and Chart.js

Sponsored Ecommerce Web-App ⬈ | React, Node.js, Express.js, MySQL   **September 2024**
- Built MensFyt, a men's fashion e-commerce platform with personalized recommendations, dynamic filtering, and a secure checkout system.
- Implemented a responsive UI with React and Tailwind CSS, enhancing user experience across devices.
- Designed RESTful APIs using Express.js for real-time inventory updates and user authentication.

Restaurant Reservation ⬈ | React, Node.js, MySQL   **August 2024**
- Built an online reservation system with real-time availability updates and a user-friendly interface.
- Developed a scalable backend with Node.js, handling concurrent reservation requests efficiently.
- Integrated MySQL for persistent storage of bookings, with optimized queries for fast retrieval.

Disaster Response Coordination Platform ⬈ | Spring Boot, HTML, CSS, JS, MySQL   **February 2025**
- Developed a platform for disaster response with real-time shelter tracking and volunteer management.
- Leveraged Spring Boot for robust backend services, enabling seamless data processing and API integration.
- Designed a dynamic frontend with JavaScript and CSS, providing real-time updates for emergency alerts.

ACHIEVEMENTS

Won 2nd Runner-Up, Innovision Avinya 2.0 24-Hour Hackathon (March 2024) – Developed a Graphical Password Authentication System.
Won 2nd Runner-Up, Innovision Avinya 3.0 24-Hour Hackathon (March 2025, Anticipated) – Designed a Disaster Response Coordination Platform.
Participant, VCET Hackathon (August 2024) – Created an educational platform for CET, JEE, and NEET preparation.
